**Notice of Possible Fee Increase on October 1, 2002**

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2002, then the amount due may be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there may be an increase in fees effective on October 1, 2002. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Notice of Proposed Rulemaking, 67 Fed. Reg. 30634, 30636 (May 7, 2002). Although a change to the amount of the publication fee is not currently proposed for October 2002, if the issue fee or publication fee is to be paid on or after October 1, 2002, applicant should check the USPTO web site for the current fees before submitting the payment. The USPTO Internet address for the fee schedule is: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of any fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after October 1, 2002 (or mailed with a certificate of mailing on or after October 1, 2002), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

***Allowable Subject Matter***

Claims 1-11 and 13-16 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or suggest a separator plate structure, used with non-planar membrane electrode assemblies, which includes a non electrically conductive substrate having electrically conductive traces on each of its outer surfaces, where the traces on opposite surfaces of the substrate are connected by at least one conductive path or via.

It is noted that this application is a national stage application of PCT/GB99/02073. The search report of PCT/GB99/02073 lists only references defining the general state of the art.

The prior art of Spear, US Patent 5,683,828 discloses fuel cell stacks which include multi-layer separator plates, but does not suggest traces on opposite surfaces of the substrate of opposite surfaces of the substrate connected by conductive paths. The prior art of Isen et al., US Patent 5,656,081 discloses processes for printing electrical circuitry on a substrate where the substrate can include electrically insulating layers. Although a fuel cell is suggested as a structure which could be formed using the process disclosed by Spear, the Spear disclosure fails to disclose or suggest any of the specifics of a separator plate structure, used with non-planar membrane electrode assemblies, which includes a non electrically conductive substrate having electrically conductive traces on each of its outer surfaces, where the traces on opposite surfaces of the substrate are connected by at least one conductive path or via.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
